Executive Summary

Technology leader and startup builder with 18 years of experience leading large-scale software organizations and engineering teams across Latin America. Proven track record of building engineering teams from zero to 100+ engineers, delivering mission-critical platforms for Fortune 500 companies, and aligning technology strategy with business growth. Experienced in cloud-native architectures (AWS), data & GenAI initiatives, and scalable web platforms, with deep expertise in organizational design, hiring, and technical leadership in distributed LATAM teams. Passionate about developing talent, driving innovation, and building sustainable technology organizations with global impact.

Professional Experience

Golabs

Chief Technology Officer

LATAM
2019 – Today

- Created and led the AI division, achieving 30% of total company revenue through AI services and solutions.
- Scaled the company from 0 to 100+ engineers across Latin America, supporting complex, high-impact projects for Fortune 500 clients.
- Acted as a strategic partner to executive leadership and clients, translating business objectives into technical roadmaps and execution plans.
- Built leadership layers (tech leads, managers, directors) to sustain growth beyond 100+ engineers.
- Designed and implemented distributed team structures across Costa Rica, Mexico, Nicaragua, Colombia, Guatemala, Argentina, the United States, and other LATAM countries.
- Led hiring, organizational design, and leadership development, building high-performance, multicultural engineering teams.

Golabs

Delivery Manager

Costa Rica
2014 – 2019

- Led end-to-end delivery for multiple client engagements, establishing repeatable delivery processes across distributed teams.
- Standardized delivery processes across projects, increasing consistency and reducing onboarding time for new team members.
- Partnered with sales and pre-sales teams to estimate effort, define delivery approaches, and support successful deal closures.
- Mentored technical leads and senior engineers, strengthening delivery ownership and decision-making at the team level.

Universidad Técnica Nacional

Software Engineering Professor

Costa Rica
2014 – 2022

- Guided student teams in launching startup projects from idea validation to MVP development and demo presentations.
- Fostered a hands-on learning environment through project-based coursework, hackathons, and real client simulations.
- Created and shared open educational resources, code samples, and technical workshops to extend learning beyond the classroom.

- Integrated entrepreneurship and real-world product development into software engineering curricula.

Avantica

Software Engineer

2011 – 2014

- Consistently met or exceeded client expectations by owning end-to-end feature development from design through deployment.
- Supported multiple client engagements, maintaining high productivity and delivery standards across contexts.
- Embedded quickly into client engineering teams, delivering production-quality features while adapting to diverse tech stacks and processes.

NCQ Solution

Software Developer

2010 – 2011

- Joined the company at an early stage and helped build the initial product from concept to first paying customers.
- Designed and implemented core system architecture that successfully scaled as the company grew.
- Delivered early MVP features under tight timelines, enabling rapid market validation.
- Took ownership of critical components that became foundational to the company's long-term success.

Leadership & Impact Highlights

- **Strategy & Execution:** Defined technical strategy aligned with business growth and enterprise client needs.
- **Engineering Leadership:** Built and led large-scale, distributed engineering organizations across LATAM.
- **Global Delivery:** Successfully delivered software solutions for Fortune 500 companies using nearshore and distributed models.
- **Talent Development:** Established hiring pipelines, career paths, and leadership structures for senior and junior engineers alike.
- **Technical Speaker:** Delivered multiple technology talks and presentations (portfolio available [here](#)).
- **Open Source Contributor:** Contributor to the Ruby ecosystem, and other community-driven projects.

Education

Massachusetts Institute of Technology

Executive Program: Chief Technology Officer

2026

Texas Tech University

Machine Learning & Data Science Program

2025

Universidad Técnica Nacional

Bachelor's Degree in Software Engineering

2013

Skills & Interests

Technical: Cloud-native architectures (AWS), scalable systems, data & AI platforms.

Language: English (C1) and Spanish (Native)

Interests: Open Source, Artificial Intelligence, Entrepreneurship
