EXECUTIVE PROFILE

Technology leader and startup builder with 18 years of experience leading large-scale software organizations and engineering teams across Latin America. Track record of scaling teams from zero to 100+ engineers, delivering mission-critical platforms for Fortune 500 companies, and aligning technology strategy with business growth. Expertise spans AWS cloud-native architecture, data and GenAI initiatives, scalable web platforms, hiring, organizational design, and distributed LATAM leadership.

PROFESSIONAL EXPERIENCE

Co-Founder & Chief AI Officer

SUBAXA

📅 Jan 2025 – Present

- Lead product and AI strategy for SUBAXA, an AI-native proptech company transforming how people invest in judicial real estate auctions in Costa Rica.
- Built the company around AI from day one, designing processes, decisions, and customer interactions with AI at their core rather than layering it onto an existing product.

Co-Founder & Board Member

Golabs

📅 Aug 2026 – Present

📍 LATAM

- Provide strategic guidance on technology and innovation, with a primary focus on Artificial Intelligence, in partnership with the leadership team.
- Evaluate emerging technologies, shape the AI strategy, and advise on long-term technical initiatives that support sustainable growth and competitive advantage.

Chief Technology Officer

Golabs

📅 2019 – Aug 2026

📍 LATAM

- Created and led the AI division, achieving 30% of total company revenue through AI services and solutions.
- Scaled the company from 0 to 100+ engineers across Latin America, supporting complex, high-impact projects for Fortune 500 clients.
- Partnered with executive leadership and clients to translate business objectives into technical roadmaps and execution plans.
- Built leadership layers of tech leads, managers, and directors to sustain growth beyond 100+ engineers.
- Designed distributed team structures across Costa Rica, Mexico, Nicaragua, Colombia, Guatemala, Argentina, the United States, and other LATAM countries.
- Led hiring, organizational design, and leadership development for high-performing multicultural engineering teams.

Delivery Manager

Golabs

📅 2014 – 2019

📍 Costa Rica

- Led end-to-end delivery for multiple client engagements and established repeatable processes across distributed teams.
- Standardized delivery practices across projects, increasing consistency and reducing onboarding time.
- Partnered with sales and pre-sales teams to estimate effort, define delivery approaches, and support successful deal closures.
- Mentored technical leads and senior engineers, strengthening delivery ownership and decision-making.

Software Engineering Professor

Universidad Técnica Nacional

📅 2014 – 2022

📍 Costa Rica

- Guided student teams from idea validation through MVP development and demo presentations.
- Built a hands-on learning environment through project-based coursework, hackathons, and real-client simulations.
- Created open educational resources, code samples, and technical workshops; integrated entrepreneurship and real-world product development into the curriculum.

Software Engineer

Avantica

📅 2011 – 2014

- Owned end-to-end feature development from design through deployment, consistently meeting or exceeding client expectations.
- Delivered production-quality features across multiple client engagements while adapting quickly to diverse technology stacks and processes.

Software Developer

NCQ Solution

📅 2010 – 2011

- Helped build the initial product from concept to first paying customers at an early-stage company.
- Designed and implemented core system architecture that scaled with company growth.
- Delivered early MVP features under tight timelines, enabling rapid market validation.

LEADERSHIP & IMPACT

- **Strategy & execution**
Defined technical strategy aligned with business growth and enterprise client needs.
- **Engineering leadership**
Built and led large-scale, distributed engineering organizations across LATAM.
- **Global delivery**
Delivered software solutions for Fortune 500 companies using nearshore and distributed models.
- **Talent development**
Established hiring pipelines, career paths, and leadership structures for senior and junior engineers.

CORE EXPERTISE

- Technology strategy
- Engineering leadership
- AWS cloud-native
- Data & GenAI
- Scalable systems
- Organizational design
- Distributed delivery
- Hiring & development

EDUCATION

Executive Program: Chief Technology Officer
Massachusetts Institute of Technology
📅 2026

Machine Learning & Data Science Program
Texas Tech University
📅 2025

Bachelor’s Degree in Software Engineering
Universidad Técnica Nacional
📅 2013

LANGUAGES

Spanish: Native **English:** C1

COMMUNITY

- Technical speaker: delivered multiple technology talks and presentations.
- Open-source contributor to the Ruby ecosystem and other community-driven projects.

INTERESTS

Open source, artificial intelligence, and entrepreneurship.
